# Expand Your Services.
Integrate Our Risk Assessment.

Through a no-cost integration with Preflight Mitigator, your customers will have access to an intuitive flight risk assessment tool that tracks risk trends, provides insights, and effectively improves flight safety in their operations!

How does this FREE integration work?

Your customer schedules a trip in your product, and we handle the rest!

1 The flight data is sent to Preflight Mitigator.

2 A risk assessment is automatically assigned to the trip. . .

3 . . .and a notification is sent to the pilot.

4 Once the pilot completes the assessment. . .

5 . . . the risk data is sent back to the trip in your scheduling software!

API

Increase your product value through an integration with Preflight Mitigator!
